Department of Mechanical Engineering

Supporting Sponsors

The energy industry and indeed the society at large are facing rapid changes which in part are due to the transition of energy from a hydrocarbon based commodity to one which has diverse sources with increasing elements of sustainability. Furthermore, the ways in which we consume energy in our daily lives is changing rapidly with altering patterns of consumption which may no longer match the traditional concepts of supply. Indeed our whole economy is inevitably moving towards a circular, sustainable economy driven by our changing lifestyle. We intend to not only explore how the energy supply industry is changing, but also the changes in the way the society consumes energy and what we as energy professionals are doing to meet the challenges ahead. Regional, including cross-border and multi-disciplinary collaboration of the energy professionals are required to achieve this goal. As such, Energy Institute Hong Kong and the School of Energy and Environment of City University of Hong Kong are jointly organizing the "6th international Conference - Meeting the Challenges of Energy Transition through Multi-disciplinary Collaboration" on 13-14 September 2018 to provide a platform to all key market players to exchange and share the updated information and technologies.

Conference Steering Committee

Chairman: **Ir Edmund KH LEUNG**, Past Chairman, Energy Advisory Committee, HKSAR Government

Members: **Ir Dr HF CHAN**, Cinotech Consultants Limited
Prof Chak K CHAN, City University of Hong Kong
Ir TK CHIANG, CLP Power Hong Kong Limited
