### Course Description

Following the Feed-in-Tariff policy, a large number of PV systems at village houses, villas, schools, institutional and commercial buildings will be installed in the coming years. The Hong Kong Association of Energy Engineers (HKAEE) Photovoltaic Panel System Training Course (PPSTC) provides in-depth technical knowledge and step-by-step methodology for design, installation, testing, commissioning and maintenance of grid-connected and off-grid solar PV systems. This course is designed ideally for professionals looking to enter solar industry, or interact with solar projects in current line of work.

The HKAEE PPSTC provides a set of local and international standards by which PV professionals with skills and experience to distinguish themselves and give the employers a credential for judging the competency of practitioners in solar industry.
