

IoT Revolution in Asia: Digital and Energy Solutions

Speaker

Ir Kim-Tang Cheuk

CEnv., CEng., FIMechE,
 FCIBSE, FHKIE

Assistant General Manager
Trane Hong Kong

Internet of Things (IoT) is swiftly expanding in the industry for intercommunicating physical devices, sensors, software, and other innovations with users and AI platform over the Internet.

This communication and interaction heavily rely on the flexibility, reliability, and connectivity of the wireless network and control technologies.

ASHRAE HKC is honoured to invite Ir. KT Cheuk from Trane Hong Kong to share the utilization of this technology such as in underfloor air conditioning system (UFAC).
