

Energy Institute Hong Kong Student Ambassador Scheme 2021-22

About the Scheme

The Energy Institute is a chartered professional membership body with 20,000 members from 120 countries, and its Hong Kong Branch is established in 1999. The Young Professional Network (EIHK YPN) is formed recently to serve young professionals and students in the energy sector.

The newly launched Student Ambassador scheme would be commenced in September 2020, and it aims at providing career development opportunities for students interested to join the energy industry, such as in areas of: renewable energy, building sustainability, power generation and transportation.

Benefits as an EIHK Student Ambassador

- Career guidance from industrial leaders and young engineers
- Exchange with international young engineers and students
- Technical visits to energy related facilities
- Opportunities to work with students from other Universities
- Leadership experience and personal growth

Commitment

The programme duration is from Sep 2021 to Jun 2022. Student Ambassadors are responsible for coordinating and promoting EIHK YPN events. Each Student Ambassador must complete a mini-project and attend at least 2 compulsory activities for getting the completion certificate.

Eligibility

- Full-time undergraduate or postgraduate students in energy related disciplines
- Passionate about energy
- Proactive, sociable and responsible

Application and selection

To apply, please fill in the application form. Shortlisted candidates would be invited to interview.

Application Deadline: 1/8/2021
