

## Energy Institute Hong Kong Student Ambassador Scheme 2020-21

### About the Scheme

The Energy Institute is a chartered professional membership body with 20,000 members from 120 countries, and its Hong Kong Branch is established in 1999. The Young Professional Network (EIHK YPN) is formed recently to serve young professionals and students in the energy sector.

The newly launched Student Ambassador scheme would be commenced in September 2020, and it aims at providing career development opportunities for students interested to join the energy industry, such as in areas of: renewable energy, building sustainability, power generation and transportation.

### Benefits as an EIHK Student Ambassador

- Career guidance from industrial leaders and young engineers
- Exchange with international young engineers and students
- Technical visits to energy related facilities in Hong Kong and abroad
- Opportunities to work with students from other Universities
- Leadership experience and personal growth
- Certificate of completion

### Commitment

The programme duration is from Sep 2020 to Jun 2021. Student Ambassadors are responsible for coordinating and promoting EIHK YPN events. Each Student Ambassador should attend at least 2 compulsory activities and are encouraged to attend more.

### Eligibility

- Full-time undergraduate students studying engineering or science
- Passionate about energy
- Proactive and sociable

### Application and selection

To apply, please fill in the application form. Shortlisted candidates would be invited to interview.

Application Deadline: 14/8/2020
