

Technical Seminar on Upcoming Trend of Renewable Energy in Hong Kong

Activity Report by Danny Leung

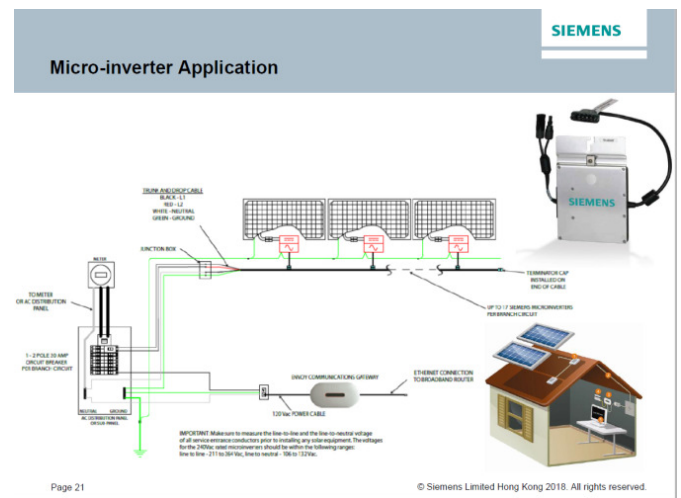

It was the first event organized by Young Professionals Network (YPN) of EIHK which was set up in 2018 Q1. The event took place in a Seminar room at the Construction Innovation and Technology Application Centre (CITAC) on 15 May 2018. It was our honour to invite Ir Henry Kwok - Manager of Building Performance & Sustainability of Siemens Limited as the Guest Speaker who had worked in renewable energy project for about 15 years

There were 23 audiences attending the seminar. At the beginning of the Seminar, the Chair of YPN – Ir Danny Leung delivered a speech about the setting up of the YPN and introduced YPN Committee Members to the participants.

Ir Henry Kwok was invited as a Guest Speaker for the event

Ir Henry Kwok discussed the trend of renewable energy in Hong Kong with top emphasis on Feed-in Tariff scheme, and then shared his experience in applying Photovoltaic systems for the Zero Carbon Building, the Open University of Hong Kong, the Jockey Club Campus and the Midfield Concourse of the Hong Kong Airport.

Application of Micro-inverter for power generation

Capacity of the Renewable Energy System	FIT Rate of Electricity (HK\$)
$\le 150kW$	HK\$5
$150kW - 200kW$	HK\$4
>200kW $\le 1MW$	HK\$3
