

Technical Visit to Times Square Water Pump Room

Activity Report by Melody Wong

About 20 participants joined the Technical Visit to Times Square Water Pump Room on 28 July 2018 with 1.5 CPD hours. The visit invited Endress+Hauser (HK) Limited to share the ultrasonic sensors that employed in Times Square to enhance the reliability of water supply system.

It was delighted to have Ir Danny Leung and Dicky Lo for the sharing session of water leakage incidents and happened in Times Square and the latest sensory technology applied.

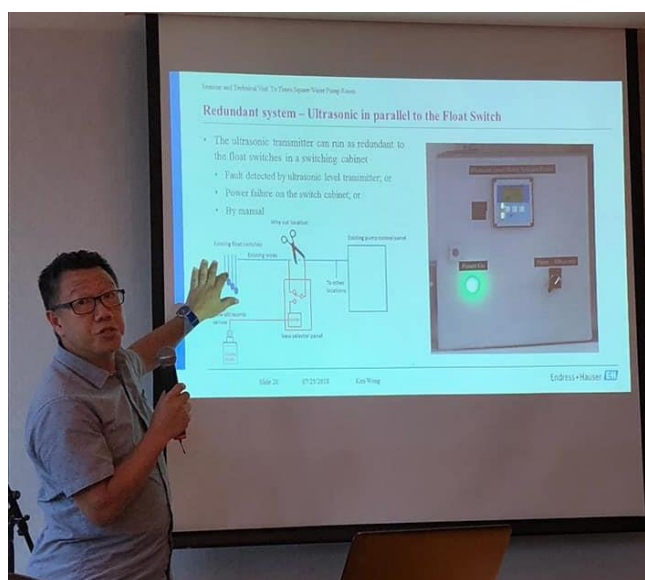

After the sharing session from speakers, a guided tour to visit the water pump plant room was led by Ir Danny Leung. Participants actively exchanged their views and opinions to the speakers. The technical visit was successfully ended with the tour.

Ir Danny Leung, Chairman of Young Professional Network of Energy Institute shared the incidents happened in Times Square
